

## Infrastructure

“The Research & Development being a focus area, a pool of talented professionals engaged in the unceasing endeavor to break new grounds and unearth fresh solutions.”

The company possesses an...

- Exceptional technical team.
- An independent Research & Development wing.
- Well established analytical laboratory & pilot plant.
- Six manufacturing sites encompassing various dosage forms.

The Research & Development & Technical Services Departments are focus areas. A pool of talented professionals are engaged in the unceasing endeavour to break new grounds and unearth fresh solutions. They ensure that our Customers perpetually derive the benefits of Innovative, Cost-Effective and Quality products, which in turn provide them with an unbeatable edge in the competitive market place.

Since the promoters of UNIJULES have been in the business of manufacturing Herbal Products and possess sophisticated manufacturing systems, the manufacture of standardized herbal formulation conforming to globally accepted and rationalized manufacturing standards is another specialised activity. UNIJULES is one of the few companies exploiting its niche in Herbal pelletization resulting in the patented HERBULES technology as well with many upcoming patents on the process of pelletization and controlled delivery systems.
